[^ ISA Activity](#)

The Australian Museum is launching *Climate Change: Our Future, Our Choice*

Incorporating ISA results, this May the Australian Museum will launch the exhibition, *Climate Change: Our Future, Our Choice*. The aim is that every visitor to the exhibition will leave feeling that climate change is an issue that involves them, knowing what kind of future is available to them and being empowered to make changes in their own life to move towards that future. These changes could be about what they do and buy, and also in their values, attitudes and understanding.

Professor Manfred Lenzen from ISA has provided the data which measures just how much our everyday choices impact our climate.

[Click here](#) to find out more about the exhibition.

[^ Education and Training](#)

Workshops will resume once CapISA SPM has launched. Visit www.capisa.com.au for up-to-date information about the software.

[^ Consulting](#)

Our aim is to continuously develop and improve in a multi- and inter-disciplinary way scientifically rigorous, quantitative, consistent and comprehensive approaches for Integrated Sustainability Analysis.

If you would like to know more about our consultancy services please contact us via email isa@physics.usyd.edu.au or call us on +61 (0)2 9036 9365 hours 9:00 – 17:00 EST.

[^ Publications](#)

- [Read](#) ISA's input into the Greenhouse Gas Protocol Technical Working Group discussion on sectoral value chain mapping of emissions by purchased categories.
- Recent worldwide media coverage has reported on China holding consumer demand responsible for their increase in CO₂ emissions. ISA and colleagues have written a [report](#) on *Shared producer and consumer responsibility* which identifies the issue and demonstrates a non-arbitrary method of consistently delineating such supply chains, into mutually exclusive and collectively exhaustive portions of responsibility to be shared by all actors in an economy.

NRMjobs has begun a new email newsletter, providing news about Australia's emerging 'green collar' jobs market. In their first issue:

[How is the recession affecting environmental jobs?](#)

[Rudd rolls out \\$650m green jobs package: calling for bids now](#)

[What are Australia's most popular green collar jobs?](#)

Australia 2020 Summit - Government Response

Australia 2020 Summit - Government Response: [Sustainability](#)

Prosperity without growth?

Prosperity without growth? – the transition to a sustainable economy report published by the UK's Sustainable Development Commission "says that the current global recession should be the occasion to forge a new economic system equipped to avoid the shocks and negative impacts associated with our reliance on growth. Ahead of the G20 Summit in London, the report calls on leaders to adopt a 12-step plan to make the transition to a fair, sustainable, low-carbon economy."

To read the full press release and/or download the report visit: <http://www.sd-commission.org.uk/pages/redefining-prosperity.html>
